

Test Cases:

1. 'Contact us' button

'contact us' button In the above image, the '**contact us**' button should be clickable and should open up a pop-up form like the below image.

2. Pop-up form and submission

Two versions of a "Talk to us" contact form. The left version shows the form with empty fields: "Work email*", "First name*", and "Last name*". There is an unchecked checkbox for "I agree to Fyle's terms and conditions, and provide consent to send me communication." and a red "Contact Us" button. The right version shows the form with filled fields: "Work email" is "Johndoe@acme.com", "First name" is "John", and "Last name" is "Doe". The checkbox is checked, and the "Contact Us" button is still present.

Designs for the pop-up form

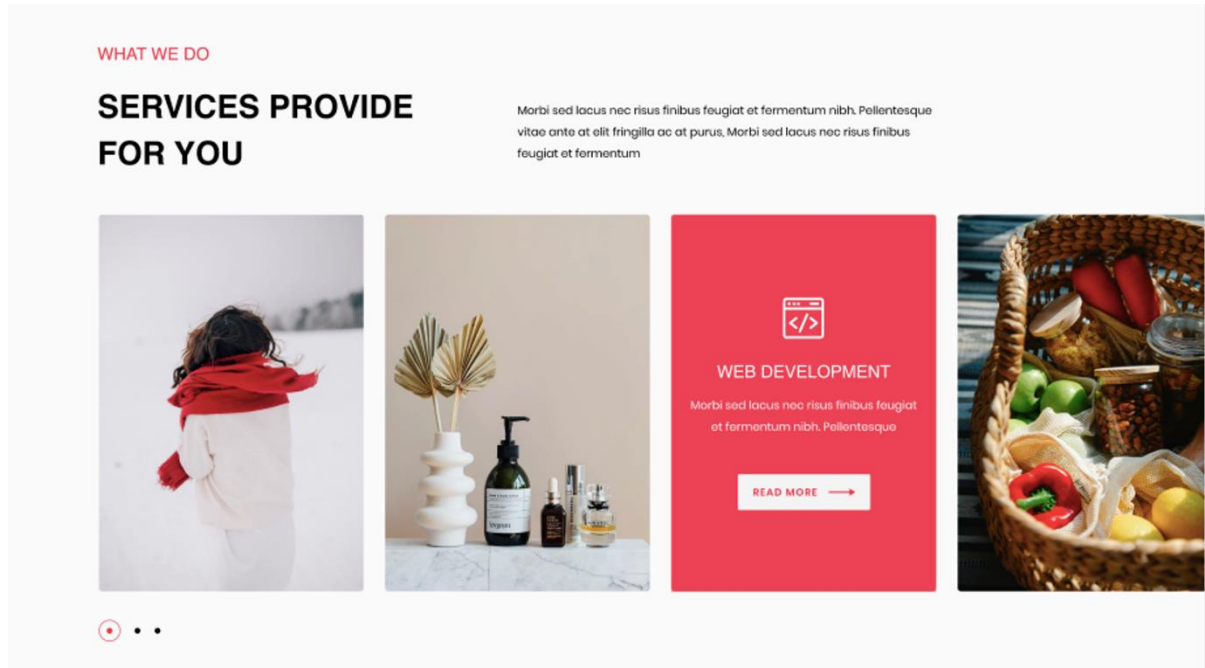

Upon submission of the details in the form above, the form details should be submitted to getform.io.

Submissions of the form:

- Create a free account in getform.io
- Create an endpoint and POST your form data into this endpoint

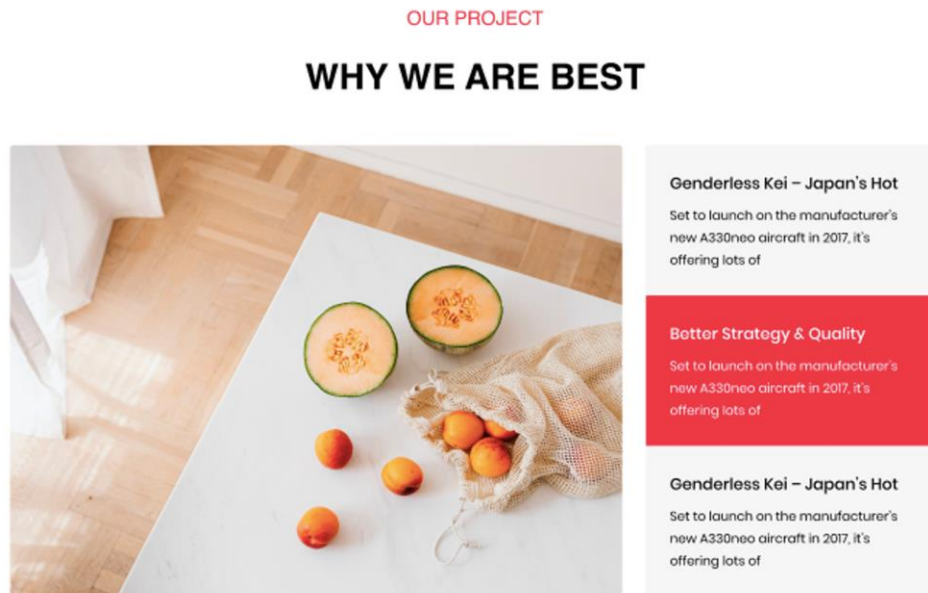

- This endpoint will simply act as an API endpoint to receive your form submissions

3.The What we do section here will be a slider with all the images sliding from left to right.

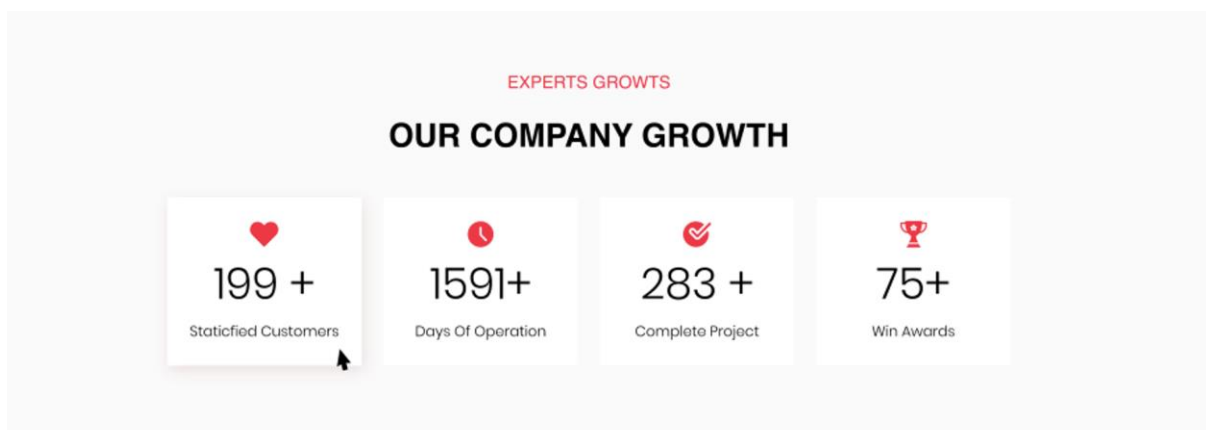

- the 3 dots on the bottom right is expected to change accordingly.
- on the hover of any image, the picture should be replaced with the design as shown in the 3rd picture here.
 - 'Read more' button here has to open 'fylehq.com' in a new tab

4. In the section 'OUR PROJECT', the image on the left should keep changing depending on the content on the right.

- The image should change on click of the content in the right
- The other 2 images can be an image of your choice.

5. Highlight on hover

- on hovering the cards in the above, there has to be a highlighted interaction as shown above
